

## **MODERATOR BIOGRAPHY**

**Kristin Dzikczek**  
**Director, Labor and Industry Group and**  
**Director, Program for Automotive Labor and Education**  
**Center for Automotive Research**

Kristin Dzikczek is the director of the Labor and Industry Group and director of the Program for Automotive Labor and Education at the Center for Automotive Research (CAR). She joined CAR in 2005 and is a coauthor of CAR's "Beyond the Big Leave" study. The Labor and Industry Group performs analysis of the automotive industry's employment, productivity, wages, benefits, education and training, occupations, labor agreements, plant locations, and capacity utilization, as well as forecasting and modeling employment and market demand. The group's research focuses on developing a better understanding of developments in human resource and education issues and policies, as well as tracking critical industry information and government data related to the existing automotive endowment, production, global competitiveness, trade, markets and automotive development in emerging economies.

Ms. Dzikczek has 20 years of experience as a researcher and policy analyst. Prior to joining CAR, she served as the associate director of the Michigan Manufacturing Technology Center, and has worked for the U.S. Congress, International Union UAW, and General Motors Corporation.

Ms. Dzikczek has published articles in the *Industrial and Labor Relations Review*, the *Journal of Technology Transfer* and the *Journal of Policy Analysis and Management*, among others.

Ms. Dzikczek earned her B.A. in economics, M.P.P. in public policy, and M.S. in industrial and operations engineering, all from the University of Michigan.
