

## **SPEAKER BIOGRAPHY**

**Anthony Norton**  
**Executive Director**  
**Global Automotive**  
**Altair**

Tony Norton is responsible for the automotive vertical in Altair's Global Markets Team. This team is responsible for the sharing of best practices both internally and externally, in addition to the communication of Altair's specific software and services offerings to key verticals.

Prior to his current position, Mr. Norton was the Practice Leader for Altair ProductDesign's Land Vehicle activity. His experience at Altair includes project management and technical leadership in diverse disciplines and multiple locations, including the development of vehicle systems, mechatronic consulting, vehicle build and test projects, subjective evaluation, test data analysis, custom software development and commercial software release. He has also worked to create engineering processes for internal and external organizations.

Before joining Altair in 1996, Mr. Norton worked at both Ford Motor Company and GEC-Marconi Avionics. He holds a bachelor's degree from The University of Hertfordshire in England.
